2D CAD systems Autodesk Dimension software has served as a traditional 2D CAD system, or alternative to the AutoCAD. Dimension's features were similar to AutoCAD, but it was a desktop application with no focus on integration with other applications and web services. Dimension was marketed for use by architectural firms, municipalities, and architects, although some other uses were also allowed, such as small companies, banks, and universities. In 2000, Autodesk announced the discontinuation of the Dimension product line. In the late 1990s, the 2D digital native AutoCAD BIM 360° was released. With BIM 360°, architects were able to work with 2D and 3D CAD models, as well as engineering models. AutoCAD LT is a low-cost CAD program that is designed to run on Windows NT 4.0. It runs on Windows 2000, Windows XP and Windows Vista, it also runs on HP-UX, AIX, SOLARIS, IRIX, and other UNIX-like operating systems. 3D CAD systems Prior to the release of AutoCAD, Autodesk also developed its own products for the drafting market. In the 1990s, they developed ACIS (Architectural Construction Information System), which was a 3D computer-aided design (CAD) program. ACIS was superseded by AutoCAD in 1994. After announcing ACIS, Autodesk discontinued its Architecture division, and released it to the open source community under the name ArchiCAD. In late 2006, Autodesk released Revit, an architecturally-oriented building information modeling (BIM) application. With the release of AutoCAD 2010, Autodesk also released AutoCAD Architecture, a general-purpose 3D CAD program, that targeted architects and structural engineers. In 2012, Autodesk introduced a dedicated architectural software, AutoCAD Architecture 3D. 3D-CAD software that is based on the same technology as AutoCAD is SketchUp. AutoCAD Architecture 3D AutoCAD Architecture 3D (or AutoCAD AR3D) is a free integrated 3D architectural CAD system that has no subscription fees. It was first released on the Windows operating system on October 15, 2012, alongside AutoCAD Architecture 2D and the AutoCAD Architecture 3D BIM 360° add-on. a1d647c40b
