- o Hyperion Datamart and Connectivity (formerly known as Hyperion Data Integrator)
- o Oracle

---

Business Intelligence Event Management (formerly known as Oracle Business Intelligence Event Manager)

- o Datasifter (formerly known as Oracle BI DataFlex)

NOTE: This product, along with the Oracle BI Suite, is part of the Oracle Business Intelligence Suite. Oracle BI

Server: Common Enterprise Business Model and Abstraction Layer Oracle BI Server is a common enterprise business model and abstraction layer to support the needs of business users for creating, managing, and using analytical applications and dashboards. The Oracle BI Server includes BI application development and deployment tools, a visual reporting tool, dashboards, content catalogs, and management tools. The Oracle BI Server is designed to provide BI functions that are:

- o Application development platform: ease the development of non-traditional BI solutions
- o Application management

---

platform: the developer and management tools help to manage and deploy applications

- o Desired capabilities for BI applications: easy-to-use tools, rich visual reporting, reusable dashboards, subscriptions, rollback capabilities, and more
- o Linked to business applications: the BI Server can be integrated with other business applications to provide additional capabilities

Oracle Business Intelligence Applications Oracle BI Answers

Oracle BI Answers is a SQL-based BI middleware product. BI Answers provides ad hoc query capability to support the execution of ad hoc queries over

09e8f5149f

1. Oracle Business Intelligence Server (OBI Server): It is the engine that drives Oracle Business Intelligence and sits in the middle of Oracle BI and your business intelligence applications, data sources, and reporting. OBI Server collects business metadata to enable it to understand your business. 2. Oracle Business Answers (OBA): OBA is an ad-hoc query and reporting tool. It enables users to query and retrieve any report, views, or Web Application that exists within OBI Server, and run reports, views, queries, data queries, and drill-downs using a Web browser. 3. Oracle Business Intelligence Interactive Dashboard (OBIID): OBIID is a graphical user interface (GUI) tool that enables users to quickly and easily create and run interactive reports and dashboards. OBIID provides a rich set of features that

---

allows you to visualize and analyze data and deliver high-impact information in the context of your business.

OBIID enables users to leverage the OBA functionality within OBI Server to generate reports for presentations or web services.

#### 4. Oracle Business Intelligence

##### Enterprise Edition Plus Disconnected Analytics

(OBIEE\_DA): OBIEE\_DA is a full-featured OLAP package that extracts, transforms, and loads data from your databases and provides fast and easy analysis of your data. It combines the speed of an interactive OLAP tool with the functionality of a traditional, stand-alone OLAP tool.

#### 5. Hyperion Enterprise Reporting

(Hyperion ER): Hyperion Enterprise Reporting is a powerful, easy-to-use tool that enables you to create and publish different types of book-quality reports,

presentations, and e-mails, or to make them interactive

for access online.

#### 6. Hyperion Financial Reporting

---

(Hyperion FR): Hyperion FR is a powerful, easy-to-use tool that enables you to create and publish different types of book-quality reports, presentations, and e-mails, or to make them interactive for access online. It includes detailed journal entries, transaction listings, balance sheets, cash flow statements, visual charts, and a variety of other reports. 7. Hyperion Web Analysis: Hyperion Web Analysis is an easy-to-use tool that enables you to preview and analyze any format spreadsheet including normal spreadsheet, HTML, XML, and XML extract files from the Hyperion Content Server. Users can easily and quickly put together and publish reports in any format. IBM Cognos Business Intelligence 3.0 IBM Cognos Business

What's New in the?

---

Oracle Business Intelligence (BI) Server is an application server that provides a powerful, proven, and scalable set of BI capabilities through a Web Services-Oriented Architecture. This server and its many BI components enable you to build, manage, and deliver business intelligence within your organization. BI is a key driver of the application-centric IT-based business strategy. The functional coverage of BI Server allows you to easily create interactive dashboards, answers, business activity monitoring and alerts, and data discovery and reporting. BI Server provides the following BI capabilities:

- BI Server functionality supports Java and J2EE development to deliver interactive dashboards, answers, alerts, and forms to retrieve data that is dynamic and refreshed in real time or asynchronously.
- BI Server functionality includes the capability to integrate into other BI applications and

---

data sources; the following BI components are included: Oracle Business Activity Monitoring, Oracle BI Answers, and Oracle BI Virtual Cube. Oracle BI Server 3.0 uses the following core technologies to provide its BI capabilities:

- Oracle RDBMS such as Oracle 9i, Oracle 10g, Oracle 11g
- Java, J2EE
- XML, SQL, Oracle Hyperion

\*Oracle Business Intelligence Suite is the recommended, all-inclusive solution for the Enterprise Edition Plus (EE Plus). Enterprise Edition (EE) is often used to refer to the Oracle BI Server and all of its essential components. Oracle BI Server EE (formerly known as Oracle BI Suite Enterprise Edition) provides the following BI capabilities:

- Oracle BI Server functionality provides the ability to integrate into other BI applications and data sources.
- BI Server components include the following components: Oracle Business Activity Monitoring, Oracle BI Answers, and
