See what people are saying: Christian Virtual Hymnal is the best hymnsequencing program I have ever tried... It is really nothing but a HYMNAL with all the features of a sequencer. I would like to use it to make Lutheran Hymnals. -Kirk Ryskamp, Lutheran Church-Mission in the USA The most extensive (and easiest to use) hymn-sequencing software in the world. -ORCIO Best choice available for church musicians, composers and songwriters. -Chung-Kuei-Lee, Pico Mundo Church There is nothing else like it on the market, save for one dedicated product which is no longer available. -Curtis R. Jones The only choice for Christian musician, composer, songwriter and church musician. -Louis Barreto, International Church Leader/Songwriter In my experience, there are only three programs that really meet the needs of aspiring songwriters (and their congregations). One is Worship Leader (Worship Technologies). The second is the Hymnal for Worship and Celebration (Abingdon Press), which is powerful and sophisticated and costly. The third is Christian Virtual Hymnal (Hymnal House) which is straightforward to use, affordable, quick and easy to learn. Hymnal House is the single best program available for the simple reason that it is not just a hymnal or sequencer. What makes it so valuable is that you can use it for everything from worship to songwriting. On the latter front, it does everything I want from a sequencing program with the added benefit of being extremely affordable. My church has kept it for years and never been happier. It does everything you need, including the following: System requirements This program will run on both 32-bit and 64-bit Windows 7 (or higher), including Windows Server 2008, Windows XP, Windows 2000 and Windows Vista.
