A: You can convert the Auth::user()->gender into a boolean by using the!! operator. $test = Auth::user()->gender; if ($test == 'Male') { echo

A metal-containing macroporous silica (CMPS) was prepared and applied to extract tetrabromobisphenol A (TBP) from aqueous solution. Several factors, including the loading time, the loading amount, the solution pH and the temperature, were investigated and optimized for the extraction efficiency. Under the optimal conditions, the adsorption capacity of CMPS toward TBP was about 54 mg/g. To achieve the maximum extraction efficiency, the extraction mechanism was investigated with the aid of a several representative probe molecules. It was found that CMPS was able to adsorb TBP molecules on its active sites through non-covalent bonds, especially the hydrogen bonds.

Furthermore, the adsorption process was facilitated by the acidic groups of the silica. The CMPS, as a kind of metal-containing sorbent, showed great potential in the removal of micropollutants in the environment.I would like to see it fit the Metro-8 as a larger version of the FX-8. Perhaps with the ability to be used as a second, smaller stage in a live set as a smaller version of the FX-8. I think it is a good idea. The FX-8 is not a small stage in a live set. It is a main stage. It would be a good way to get rid of the FX-8. Quote: There's still a couple of big hardware specific issues to address, though. The VST Plugin. 2 x FX-8 = 3 x FX-8 Midi Out? Not a great idea, and they didn't allow 1 Midi Out on the FX-8 to go to the FX-8
